

Java Software Developer

Location: Derby

Salary: £25,000 - £30,000 + Benefits

Job Type: Permanent

Company: MPEC Technology Ltd

Keywords:

Java, Web, Flex, Spring, Hibernate, Developer, Engineer, Software, Enterprise, Rail, Graduate, J2EE

Highlights:

- Small company
- Agile development approach
- Cutting edge technologies

Personal Skills:

Communication: Ability to interact with developers and business people.

Creativity: We are always looking to harness new technologies and find innovative ways to meet our customers' needs.

Discipline: To follow agile technical practises and always strive to deliver code to a high standard.

Technical Skills:

- Java
- Object-oriented development
- Good understanding of relational databases (e.g. MySQL)
- Spring or other framework experience desirable
- Hibernate / JPA (or other ORM) experience desirable
- Web development experience

Background:

In ten years MPEC has gone from inception to being the leading supplier of condition monitoring hardware to the UK railway and has helped make Britain's railways safer and more reliable; this

growth has been remarkable.

We are investing heavily in R+D and are now looking for someone to join the company who can help drive the next phase of growth, by delivering new cutting edge web-based software for the global railway signalling data acquisition and data processing market.

Your Role:

We are looking for a bright, highly motivated individual to join a small enterprise Java/Flex development team. In addition to utilising and extending your experience in enterprise Java development, you will be encouraged to develop your skills in new and upcoming technologies including HTML5 and Adobe Flex.

Although Java development will be your mainstay, due to the nature of MPEC's business there is opportunity to diversify and participate on projects involving embedded software development, embedded hardware design, circuit design and product design. Domain knowledge of railway signalling is not expected and in this respect full training will be offered.

This is a unique opportunity to get into a small, fast growing high-tech company. As a developer in a small company you will not only be making a real difference to rail passengers all over the world; you will have the opportunity to help steer current and long-term software development strategy.

Benefits:

- Flexible working hours
- Railway station location
- Company bicycle
- Discounted commuter rail travel
- 50% discounted rail leisure travel for you and a partner
- Free lunch
- Company pension scheme
- Stock options

To apply, please send your CV and covering letter to careers@mpec.co.uk.

Closing Date: 30 March 2012
